

Diapering Procedure

(See Also Toileting Procedure)

The following procedures will be followed by each staff member for every child.

When diapering a child, staff will:

- Line the changing area with a disposable paper sheet
- Wash both their own and the children's hands and apply gloves.
- Have hands on child at all times, clean child with baby wipes, use child's individual diaper cream as required by parent, and put on a clean diaper.
- Dirty diaper and paper cover will be disposed of in a covered receptacle.
- Wash their own as well as the child's hands with soap and water after diapering a child.
- The diapering table will be disinfected after each diapering with Clorox Disinfecting Wipes.

The diaper receptacle will be emptied out daily.
