Toddler Bathroom Supervision Procedure - Ellington

When it is time to use the bathroom, one teacher will take two children to the bathroom while the other teacher remains in the room if there are six total in the classroom. If the ratio is under four and there are two teachers present then one adult can take an individual child to the bathroom as necessary. If there is another adult present that can come into ratio so that the teacher can take a child to the bathroom that would be a safe solution as well.

The children must be supervised on the way to the bathroom and back. They are not allowed to walk unsupervised to or from the bathroom.
